

## FOREWORD

The purpose of this Resource Manual for Medical Directors of Transfusion Medicine is to provide support and guidance to physicians responsible for transfusion medicine services in the Province of Ontario. It provides a framework outlining sound transfusion laboratory practice, and seeks to advocate for appropriate current practices in the use of both labile blood components and manufactured products. The manual may also serve to assist Medical Directors of Transfusion Medicine Services in their interactions with hospital administration and medical staff in remediation of shortcomings in Transfusion Medicine resources and practices, and also in the area of promotion of education in Transfusion Medicine.

## CONTRIBUTORS

### General Content:

Dr. Peter Pinkerton, Consultant physician to ORBCoN  
Dr. Jeannie Callum, Sunnybrook Health Sciences Centre, Toronto  
Dr. Jacob Pendergrast, University Health Network, Toronto

### Pediatric Content:

Dr. Wendy Lau, The Hospital for Sick Children, Toronto  
Dr. Elaine Leung, The Children's Hospital of Eastern Ontario, Ottawa  
Dr. Victoria Breakey, McMaster Health Sciences Centre, Hamilton

## ACKNOWLEDGEMENTS

ORBCoN gratefully acknowledges:

The Blood Programs Coordinating Office of the Ontario Ministry of Health and Long Term Care for their financial support.

The British Columbia Blood Programs Coordinating Office for granting copyright permission to use their document by the same name as a template for the Ontario version.

The following community hospital pathologists who reviewed the document:

Dr. Allison Collins, Peterborough Regional Health Centre  
Dr. Kerry MacDonald, Kenora Rainy-River Regional Laboratory Program  
Dr. Gregory Twemlow, Quinte Healthcare Corporation  
Dr. Joseph Wasielewski, Thunder Bay Regional Health Sciences Centre  
Dr. Pam Cyr, Cambridge Memorial Hospital

## COMMUNICATIONS

The Ontario Regional Blood Coordinating Network welcomes queries regarding this edition of the Resource Manual for Medical Directors of Transfusion Medicine, and invites suggestions for improvements in future editions.

## WAIVER OF LIABILITY

The information contained in this document is intended to serve as a guideline only and does not replace a treating physician's clinical judgment in individual patients. Neither the contributing authors nor the Ontario Regional Blood Coordinating Network shall be liable for any actions, claims, damages, costs or obligations arising from use or misuse of the material contained in this document.

This document is protected by copyright and may not be reproduced in whole or in part in any form without the written permission of the Ontario Regional Blood Coordinating Network.

## INTRODUCTION

This Resource Manual for Medical Directors of Transfusion Medicine has been produced by the Ontario Regional Blood Coordinating Network, acting under the authority of the Ontario Blood Programs Coordinating Office of the Ministry of Health and Long Term Care of the Province of Ontario. It is intended to provide a guide towards the operation, consistent throughout the Province, of the Transfusion Medicine Services by Ontario hospitals, within the context of the capacity of individual institutions of variable size and complexity.

The Manual recognizes the need to comply with the standards defined by the Canadian Standards Association (CAN/CSA) and the Canadian Society for Transfusion Medicine (CSTM) and may be used as a guide to determine where there are deficiencies in practice and the measures necessary to remedy these deficiencies. The policies, procedures and processes presented may not address all clinical eventualities and are not intended to replace a physician's clinical judgment nor the need for consultation with an expert in transfusion medicine.

It is recognized that the implementation of the policies, processes and procedures proposed herein may represent a challenge for many institutions which provide Transfusion Medicine services. Thus this document should be regarded initially as a guide to organizing Transfusion Medicine policies and a statement of the policies, processes and procedures to be achieved over time – a kind of “road map” to a destination rather than a statement of the current situation in most hospitals.

Each section contains references to the literature, to statements of “Standards” or recommended practices, and relevant Government sources to provide guidance and information to those responsible for determining and implementing policies, procedures and processes for the conduct of Transfusion medicine in hospitals.
